COMPANY OVERVIEW

Dar Alwahaj Technical Services LLC, operating under the brand **DAW Tech Services**, is a UAE-based technical services company providing integrated engineering, infrastructure, security, facility management, and maintenance solutions.

We deliver reliable and professional services to commercial, industrial, residential, and specialized facilities, with a strong focus on **data centers, CCTV and security systems, structured cabling, fiber optics, HVAC, electromechanical systems, and cleaning services**.

Our objective is to provide clients with dependable technical solutions that improve operational efficiency, safety, reliability, and long-term asset performance.

OUR VISION

To become a trusted technical services partner in the UAE, recognized for quality, reliability, innovation, and professional service delivery.

OUR MISSION

To provide integrated technical and facility support solutions that meet our clients' operational requirements through:

- Professional workmanship
- Quality-focused service delivery
- Reliable project execution
- Safety-conscious operations
- Responsive customer support
- Efficient maintenance solutions
- Continuous improvement and innovation

OUR CORE SERVICES

DATA CENTER SERVICES

We provide technical support and infrastructure services for data center environments, with an emphasis on reliability, organization, safety, and operational continuity.

Services include:

CLEANING SERVICES

We provide professional cleaning and facility-support services for commercial and other managed environments.

Services include:

- Office cleaning
- Commercial cleaning
- Building cleaning
- Common-area cleaning
- Deep cleaning
- Routine cleaning
- Facility supports services

INTEGRATED TECHNICAL SOLUTIONS

At **DAW Tech Services**, our strength lies in providing multiple technical services through a single professional service partner.

Our integrated capabilities include:

Data Center → CCTV → Fiber Optics → Cat6 → HVAC → Electromechanical → Cleaning

This integrated approach can help clients simplify service coordination while maintaining consistent standards across their facilities.

WHY CHOOSE DAW TECH SERVICES

Professional Approach

We approach every project with attention to quality, safety, documentation, and client requirements.

Integrated Services

Our range of technical and facility services allows clients to coordinate multiple requirements with one service provider.

Reliable Support

We aim to provide responsive technical support and practical solutions to minimize operational disruption.

Quality Workmanship

Our focus is on delivering work that is organized, dependable, and aligned with project requirements.

Client Focus

We build our services around the specific operational needs and expectations of each client.

OUR SERVICE APPROACH

UNDERSTAND

We identify the client's requirements, site conditions, and operational objectives.

PLAN

We develop an appropriate technical approach, scope of work, and execution plan.

EXECUTE

Our team carries out the work professionally while maintaining safety and quality standards.

TEST & INSPECT

Systems and completed work are checked to ensure they meet the required specifications.

SUPPORT

We provide ongoing maintenance, troubleshooting, and technical support where required.

QUALITY & SAFETY

Safety and quality are fundamental to our service approach.

We aim to ensure that all activities are performed using appropriate procedures, qualified personnel, suitable equipment, and responsible work practices.

Our focus includes:

- Workplace safety
- Quality workmanship

- Proper installation practices
- Preventive maintenance
- Site cleanliness
- Client requirements
- Professional documentation

OUR CLIENTS

We support a wide range of customers and facilities, including:

- Commercial buildings
- Offices
- Data centers
- Retail facilities
- Residential buildings
- Industrial facilities
- Warehouses
- Property management companies
- Facility management companies
- Contractors and system integrators

FUTURE DIRECTION

DAW Tech Services aims to expand its technical capabilities and establish long-term partnerships with organizations requiring dependable infrastructure, maintenance, security, and facility-support services.

We are committed to developing our people, improving our technical capabilities, adopting modern technologies, and delivering services that create long-term value for our clients.
